What things can hurt me?

- ① Grain Wagons & Bins
- ② Farm Yard
- ③ Farm Machinery
- ④ Sun

Grain Wagons and Bins Children should never play around or in any farm equipment. Grain wagons and bins can especially be dangerous as they can lead to grain entrapment.

Farm Yard The farm yard can be very busy with moving vehicles and farm equipment. Children should be careful while playing and avoid areas where vehicles are coming and going.

Farm Machinery Large farm equipment can be loud and damaging to hearing if proper noise protection is not worn. Children should not be playing behind or around tractors in any circumstance. Tractors are very large and loud, and drivers may not be able to see or hear children in the area. Children should play in a safe area away from any parked or moving equipment.

Sun Unprotected exposure to ultra-violet (UV) rays can be dangerous for people of all ages. Children should wear proper protection while playing outside in the sun.
