

Social Media Guide: BeGrainSafe Week

August 10-16, 2026

The Canadian Agricultural Safety Association is hosting the sixth annual BeGrainSafe Week to raise awareness about the dangers of moving grain and the BeGrainSafe program.

Below are sample social media posts that highlight grain safety and encourage all Canadians to #BeGrainSafe.

For more BeGrainSafe resources, please visit casa-acsa.ca/BeGrainSafe-Week.

Promo Graphic	Aug. 10-16 is BeGrainSafe Week! This week is a reminder that resilient and successful farms depend on the health and safety of the people behind them. For more information, visit casa-acsa.ca/BeGrainSafe-Week .
Did You Know Graphic	When grain goes out of condition, it can form a hard crust known as a grain bridge. Though it may look solid, the crust can easily collapse under a person's weight, causing them to become trapped in the grain. Understanding this hazard is crucial for preventing grain entrapments. Get more safety tips at casa-acsa.ca/BeGrainSafe-Week . #BeGrainSafe
Grain Entrapment Graphic	Did you know that moving grain acts like quicksand? You can't "swim" your way out, and once caught in it, you can sink in seconds and become trapped. Learn how to #BeGrainSafe at casa-acsa.ca/BeGrainSafe-Week .
Grain Bag Image	Grain bags are a convenient option for storing grain, but they can also pose serious safety risks. Never enter a grain bag or walk on top of one, which could lead to injury or entrapment. Find more grain safety tips at casa-acsa.ca/BeGrainSafe-Week . #BeGrainSafe
Grain Safety Course Image	Want to brush up on your grain safety knowledge? This #BeGrainSafe Week, learn about grain handling and storage hazards with a FREE online safety course. For more details: casa-acsa.ca/training/online-training .
Grain Can Be Dangerous Graphic	Every second matters when working around grain. This #BeGrainSafe Week (Aug. 10-16), make safety a priority by following safe work practices and spreading the word about the importance of grain safety to help prevent avoidable tragedies. Learn more about grain safety at casa-acsa.ca/BeGrainSafe-Week .
Grain Accidents are Preventable Graphic	It's #BeGrainSafe Week! What's one of the best ways to stay safe around grain? To stay out of grain bins whenever possible. That's why proactively monitoring the condition of grain and addressing issues early are important since they can reduce the need to enter a bin.
