FOR IMMEDIATE RELEASE

### **BeGrainSafe Around Grain Hazards**

With the busy harvest season underway and combines and augers put to plenty of work, don't lose sight of the importance of staying safe around grain.

It's no secret that working with grain involves various safety risks, including health concerns, fire hazards, explosions, and the dangers of entrapment.

In fact, grain entrapment can occur in seconds. Bridged grain, flowing grain, and grain avalanches are all extremely hazardous and can quickly engulf a person, leading to serious injuries or fatalities.

Help ensure the well-being of everyone on your farm this harvest season by prioritizing grain safety.
