

# FARM ANIMAL SAFETY COLOURING PAGE

When you're around farm animals, it's really important to be extra careful, especially with mothers and their babies. Mama animals can sometimes be protective, so always ask an adult if it's okay to get close. Some animals, like cows or horses, can be big and strong, so be cautious and never try to approach them without permission. Always stay safe and ask before you get too close to any animal on the farm!
