

FARM SAFETY CONTRACT FOR KIDS AND PARENTS

A farm safety contract is a great way to instill the importance of safety between a parent and child. Print out this contract, talk about the safety rules important for your farm, write them down and sign it together.

This contract is both a conversation starter on farm safety and an agreement that lets kids and parents create customized farm safety rules.

It is a positive commitment both parties are sure to remember long after the ink dries.

WHAT ARE THE BENEFITS OF HAVING A FARM SAFETY CONTRACT?

FOR KIDS

This farm safety contract can help you understand the hazards found on your farm. You can talk about places and situations that might be dangerous and what you can do to avoid them. Also, you can take this time to ask your parents how they are staying safe too!

FOR PARENTS

This contract can help your child understand the hazards and risk found on your farm. Take the time to talk about why certain areas of your farm or specific tasks are dangerous. Use this contract as a tool to make a clear commitment to safety on your farm.

REMEMBER: Take into consideration your child's age, ability to understand and their physical skills when deciding which rules to include on your farm safety contract. For more information about children's development visit cultivatesafety.org.
