FOR IMMEDIATE RELEASE

Farm Machinery Safety

When it comes to using farm machinery, injuries can occur in the blink of an eye. Incidents like rollovers and runovers often cause serious, life-changing injuries or worse.

That's why it's essential to remain vigilant about safety when using farm machinery. That means never allowing extra riders on machinery, ensuring bystanders like children aren't nearby, following manufacturer guidelines on towing restrictions, and using rollover protection structures and seatbelts.

Remember that while injuries involving farm machinery are often serious, they are also preventable.

This Canadian Agricultural Safety Week, we celebrate Your Farm, Your Family, Your Success. For more information on how Safety is Our Promise, visit agsafetyweek.ca.
